REISSUE APPLICATION DECLARATION BY THE INVENTORS

Assistant Commissioner for Patents
Box NEW REISSUE APPLICATION
Washington, D.C. 20231

Sir:

As a below named inventor, I hereby declare that:

1. My residence, post office address and citizenship are stated below next to my name.

2. I believe I am an original, first and joint inventor of the subject matter which is described and claimed in U.S. Patent No. 6,041,031, granted March 21, 2000, and for which a reissue patent is sought on the invention entitled "OPTICAL DISC RECORDING/ REPRODUCTION APPARATUS AND METHOD," the amended specification and claims of which are attached hereto.

3. I have reviewed and understand the contents of the above identified specification, including the claims, as amended for this reissue application.

007027-92792260

4. I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

5. I hereby claim foreign priority benefits under 35 U.S.C. 119 of Japanese Patent Application No. P08-340904 filed on December 20, 1996. I further state that no foreign applications for patent or inventor's certificate were filed having a filing date before that of the above-identified application on which priority is claimed.

6. I verily believe the original patent to be wholly or partly inoperative or invalid, by reason of the patentee claiming more or less than he had the right to claim in the patent.

7. At least one error upon which reissue is based is described as follows: The independent claims 1 and 7 in the original patent each includes in its last paragraph the limitation "a distance between the objective lens and the forward lens of 25 μm or less." This limitation is inconsistent with the description of the invention provided in column 5, lines 41 to 45, of the original specification of the '031 patent, and therefore, may render the scope of these claims indefinite and at least partly inoperative or invalid under 35 U.S.C. 112. This limitation, if construed without the benefit of the corresponding language of the patent specification (column 5, lines 41 to 45), may also cause the scope of the original claims to be too narrow to read on an apparatus that has a distance between the objective lens and the forward lens of more than 25 μm , thereby rendering the original patent at least partly inoperative for this additional reason. The limitation in claims 1 and 7 should have properly read --an assembly accuracy of a distance between the objective lens and the forward lens of $\pm 25 \mu\text{m}$ [or less]-- to make the claims

correspond with the original patent disclosure, as set forth in column 5, lines 41 to 45, of the '031 patent.

8. Another error upon which reissue is based is found in independent claim 8. This error is the same as that described in the preceding paragraph in connection with independent claims 1 and 7, except that claim 8 uses the terms "first lens" and "second lens" instead of "objective lens" and "forward lens," respectively.

9. This reissue application also includes an amendment to correct a typographical error in column 1, line 28, of the specification, to change "font" into --front--. Support for this amendment is found, for example, in column 1, line 45, which recites "wave front aberration."

9. All errors corrected in this reissue application arose without any deceptive intention on the part of the applicant.

10. As a named inventor, I hereby appoint the following attorneys and agents to prosecute this application and transact all business in the U.S. Patent & Trademark Office connected therewith:
